Sustainable Development and Cleaner Production Center (SDCPC)	Turkey	100	3	Istanbul Development Agency	Istanbul Development Agency	October 2015 -	
Detailed description of project					Type of services provided		
<p>Main targets of this project are to comprise a national standardization for personal care products and cosmetics industry, to provide added value of the products and to improve the information and technology level of economic applications and raise the global competition locally and globally. This study can be considered as a road map for sustainable development in selected industry. By doing these studies and applying the results, investors will make profit in the long run. Moreover, they can protect the environment widely with the cleaner production methods and they can provide more safe and livable world for the future. The knowledge and awareness of eco-efficiency and eco-innovation in personal care products' sectors will be increased. Accordance with the current legal requirements, methods and policies will be developed to carry the level of international competition. The logo will testify that the labeled products meet strict limits on the use of dangerous substances, have a lower impact of the aquatic environment, set high standards of biodegradability, limit packaging waste and have a high level of performance.</p>					<ul style="list-style-type: none"> - Development of an Information Transfer Platform <ul style="list-style-type: none"> - Preparing ecolabelling checklist - Five LCA studies for different PCPs
